About This Game

Robby's Adventure is a side-scroller platformer game where you will guide a robot named Robby through numerous obstacles and challenges. Sometimes it will be too easy and sometimes very hard. Sometimes you will have to slow down and sometime run with all your legs.

Robby came to us from another planet and managed to get a real friend.

The boy liked to play with Robby very much but once the misfortune happened - Robby was broken.

Boy's parents gave the toy for repair and then our adventure begins.

The factory manager quickly realised the this was more than a toy and decided not to return the toy to the boy. He wanted to research Robby and use it for his own purposes.

Robby decided to fix himself and return home. But it will be really hard...

[Entertaining for a little bit, but can become quickly repetitive. Before you begin, you can choose from several different ships. Each ship has its own unique weapon. Weapon types vary between machine gun, rockets, and some kind of sonic boom weapon. Weapons can be upgraded 3 times by picking up crates dropped by boss enemies.](#)

[You spawn in and have to defeat ever increasing waves of enemies. There are ships who seek you out and try to shoot you, ramming ships, and larger capital type ships. Asteroids fly through the map and can kill both you and your enemies. Enemy AI is kinda bad. Ships will fly directly towards you as soon as they spawn. They will fly directly into asteroids to try and get to you.](#)

[I tried to use my Xbox controller, but it was very glitchy. It worked for about a minute before the ship constantly flew to one side of the map and then the game crashed. Mouse control is better, but I feel like it could be a lot smoother. The game does feature a leader-board, which is pretty cool. After about 20 minutes of playing, I was 2nd on the leader-board.](#)

[Overall, I'd wait until the Dev does some polishing/bug fixing. Hard to justify right now for over \\$2.](#)

[.still worth playing even if you plan to buy the retail game! There are 3 different endings too so you will keep busy for a while.... Recieved a closed beta key a while ago and i've been around long enough to see the game start to take shape. It's not all the way there yet, there are still errors and the balance can be a little wonky sometimes but even with those issues it's already a whole lot of fun, and the co-op mode offers something that I personally haven't seen in any other DCCGs.](#)

[The devs are great, they listen to feedback and get involved with the community and they do it all with the same sense of humour that is injected into the game itself in large fable size doses.](#)

[So yeah I'd definitely recommend it, but to any potential buyers i'd say just make sure you know what you're buying into. The game will be free eventually so unless you're ready to jump in right now, and are willing to put up with a few bugs and balance issues and genuinely want to help the game move forward, you might be better waiting until it releases and you can get it for free.. The entire game is a boring grind. Very little back story and very little actual game play. If this game was free it still would not be worth downloading.. you can hire a catapult mercenary group as the dwarves with goblins chained to the rock ammo-10V10.. Expected to want to use the legendary Red Hare](#)

[But Horse has 999 in all stats](#)

[10V10 would get traumatized again. Bad game. Terrible President. So sad.. this game is amazing its like undertale but it is way more fun i devoted all of my time into play-testing this game! keep up the good work!. The game is fun, but HOLY the soundtrack is amazing!](#)
